Education

VIT Bhopal University

B.Tech in Computer Science and Engineering (Core) | CGPA 8.23

Sehore, MP

2023 – Present

Senior Secondary Education (12th Grade)

Percentage: 87.2%

Boisar, Maharashtra

2023

Secondary Education (10th Grade)

Percentage: 99.6%

Boisar, Maharashtra

2021

Experience

VIT Bhopal University - Android Club

Lead, Operations Department

April 2024 – April 2026

- Defined event objectives and user journeys for 1000+ attendees; led cross-functional coordination across speakers, designers, and logistics teams, applying end-to-end product ownership from ideation to execution.
- Identified friction points in event discovery and drove targeted promotional strategy improvements, resulting in measurable growth in participation and stakeholder satisfaction.
- Managed budgeting and resource prioritization across multiple workstreams, balancing constraints to maximize student outreach while minimizing operational overhead.

VIT Bhopal University - Matrix (The Multimedia Club)

Co-Lead, Technical Department

January 2025 – September 2025

- Designed and delivered structured onboarding sessions on UI/UX principles and prototyping tools (Figma, Adobe CC), enabling junior members to independently execute design tasks with measurable quality improvement.

Projects

Age & Gender Prediction Model | *Deep Learning, TensorFlow, Computer Vision*

- Translated fairness as a core product requirement into a technical specification — designed a Hybrid CNN-Transformer model (ResNet50, VGG16) achieving 95% validation accuracy in gender classification while prioritizing equitable outcomes across demographic groups.
- Iterated on model performance using custom Parity Loss and dynamic sample weighting, significantly reducing Mean Absolute Error (MAE) — demonstrating a data-driven product improvement cycle from hypothesis to validated outcome.

AIO Pharmacy | *Data Engineering, Geospatial Analysis, Python*

- Defined the core user problem — fragmented medicine availability across providers — and architected a unified digital health platform with availability-aware navigation to bridge the gap between prescription and fulfillment, starting from user need rather than technology.
- Built the product's data backbone from scratch — curating and standardizing a pharmacy dataset to power proximity-based search and real-time inventory features, validating the concept end-to-end before scale.

Skills & Interests

Languages: C++, Python, R, SQL

Web & Design: HTML, CSS, JavaScript, Figma, Adobe Photoshop, Illustrator

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Figma (Prototyping & Wireframing), Notion, AI Tools (Claude, ChatGPT, Gemini)

Core Competencies: Product Thinking, User Research, AI-Powered Prototyping, Data Analysis, UI/UX Design, Cross-Functional Collaboration

Certifications

Adobe UI/UX Certification (Ethnus): Certified in User Research, Information Architecture, Wireframing, and Prototyping using Figma and Adobe Creative Cloud.

Introduction to Machine Learning (NPTEL): Online certification course covering core ML algorithms, supervised/unsupervised learning, and applications.

Marketing Analytics (NPTEL): Completed certification focusing on data-driven marketing strategies, customer segmentation, and predictive modeling techniques.
